

# Working Prototype Known Problems Report

**Product Name:** Cellular Automata Simulator

**Team Name:** The Cellulites

**Date:** December 2, 2018

## FUNCTIONS NOT WORKING CORRECTLY

---

1. No limit for zooming in on cells. Can infinitely zoom in. Doesn't have any negative effect on the site but possibly something that should consider being limited.
2. No specification on state. User can give 100 as a state even though it doesn't make sense for a CA such as Game of Life.
3. We do not have a file directory system
4. We do not have a guided tutorial
